LM Randomly Good | Recap

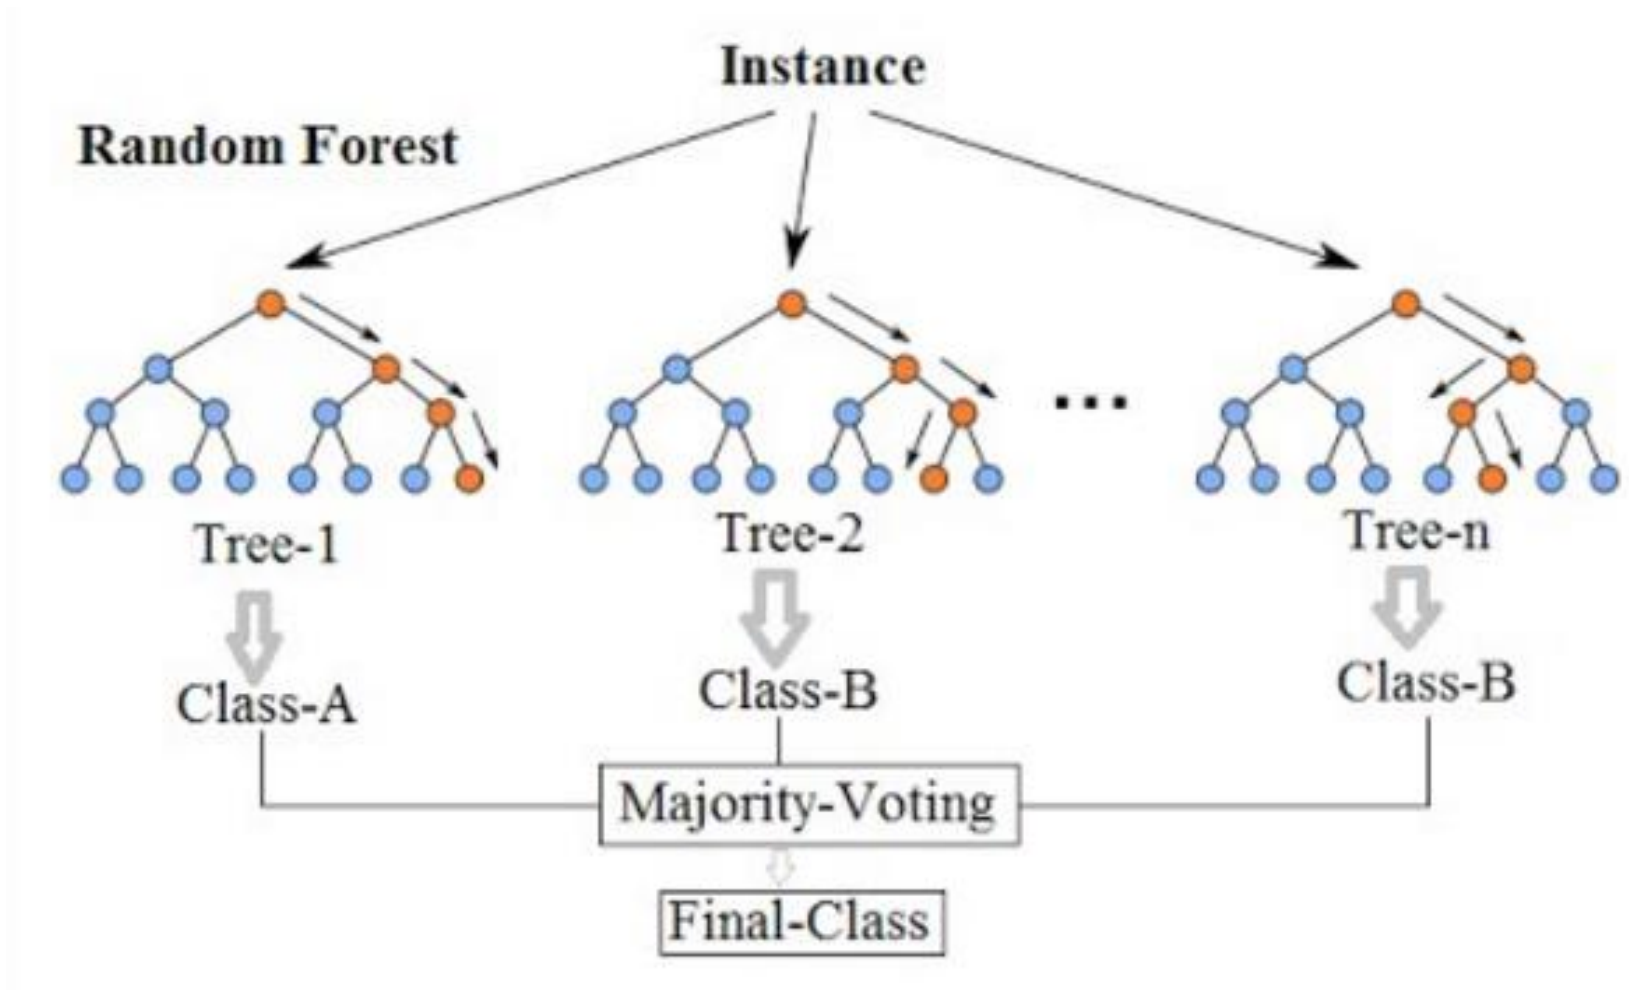

Last Session...

LM Randomly Good | Learning Objectives

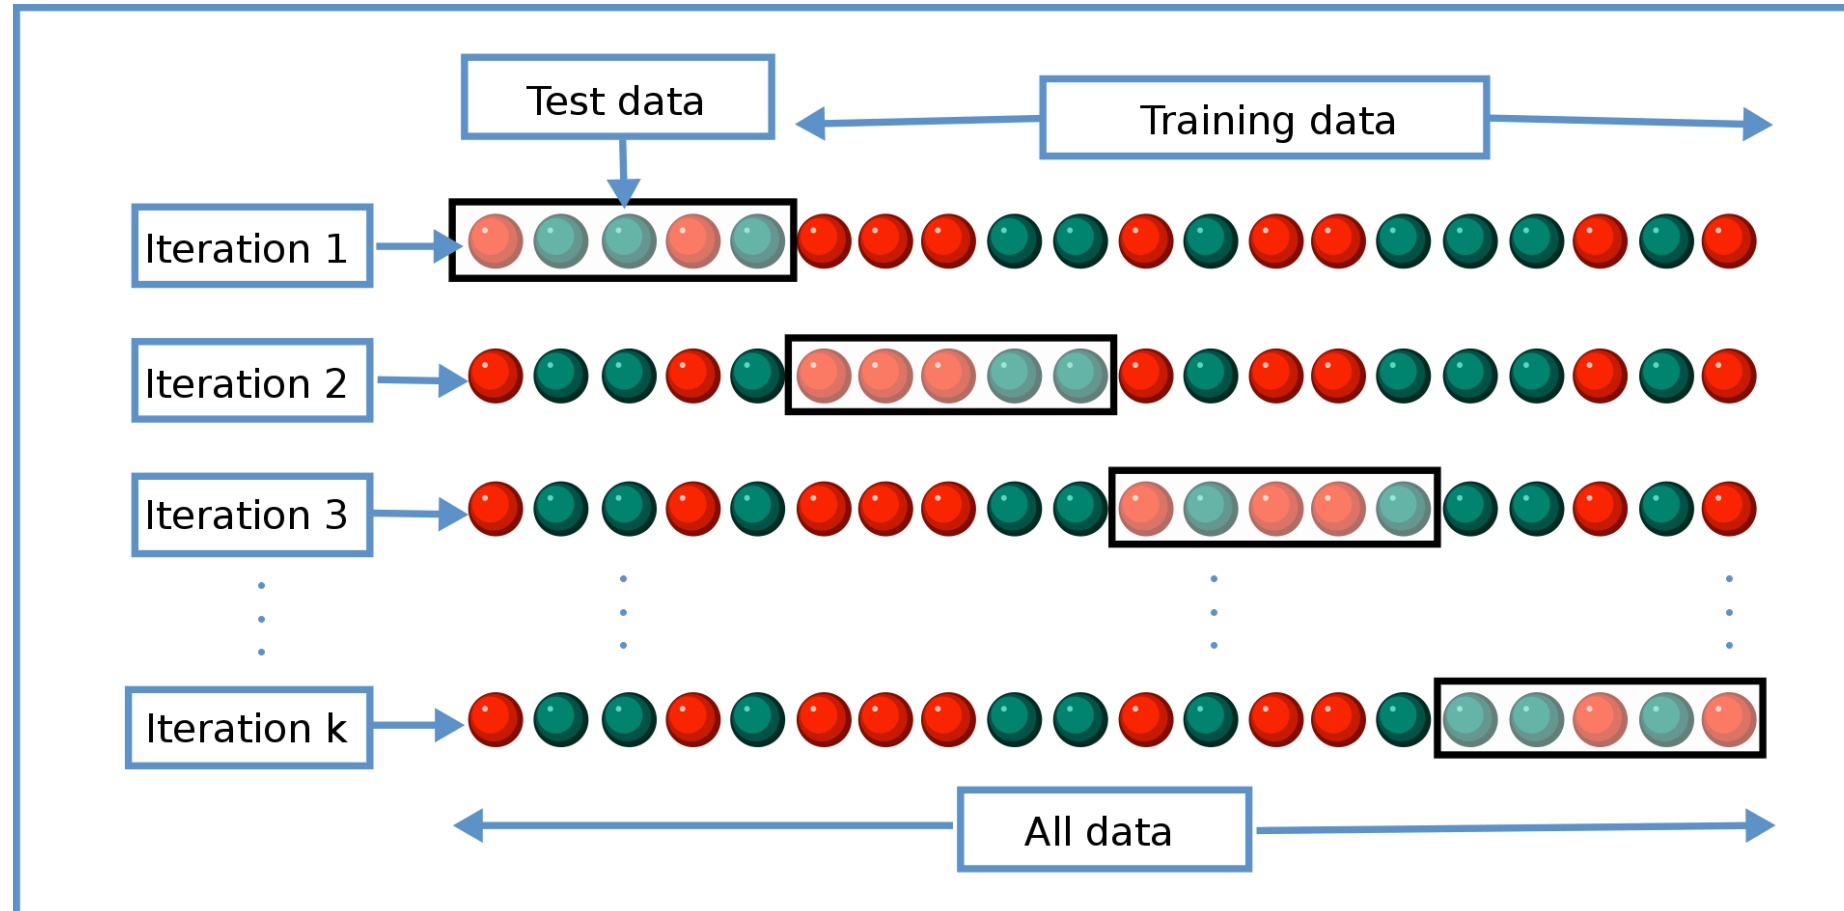

At the end of this unit you should be able to

- prepare your data for machine learning,
- understand the basic concept of random forest,
- train a random forest model with random cross-validation,
- determine the suitability of random cross-validation as a validation strategy for spatial data.

LM Randomly Good | Random Forest

LM Randomly Good | Cross-Validation

LM Randomly Good | Prediction or coincidence?

LM Randomly Good | Spatiality
